

Restore Liss Protein

Smoothing and Treatment

BRAZILIAN KERATIN

RESTORE LISS PROTEIN is a 100% aldehyde-free (formaldehyde, glutarol) with anti-frizz action used to straightening the hair fibers and reduces its volume.

Its exclusive formula is enriched with a blend of Amino Acids - high intensive repair technology that replenish proteins and nutrients lost because of the use of chemical processes or natural weary, deep restoring the hair fibers.

Formulated with Karite Butter and Nutritive Complex Oils: coconut oil, argan oil, macadamia oil and almond oil. Provide smooth, sealed, soft, and malleable hair.

EAN 7796996591662

STEP BY STEP

1. Wash the hair with the DEEP CLEANING SHAMPOO 2-3 times.
2. Dry the hair 90%.
3. Shake the product before applying.
4. Apply RESTORE LISS PROTEIN at a distance of 1 cm from the roots aligning strands by strands. Starting from the nape towards the forehead. Let it act for 50 minutes.
5. Rinse the hair and remove 50% of the product.
6. Dry the hair 100% and make a blow dry.
7. Once the hair is dry, use the hair straightener in thin strands (8 to 12 times), strand by strand, in order to align it, using temperatures between 190° to 200° (for sensitized hair or hair with chemistry) and 230° (for natural hair).

WARNING

Hair colouring: we recommend you colour the hair **AFTER** the treatment.

Discoloration, highlights, reflections and ballayages: We recommend you do this **BEFORE** the treatment or two weeks after you have done it.

Don't use the product in Hair Extensions or in natural gray hair
